

Gear Drive Extension

Village of New Lenox

In order to allow for proper access to the New Village Hall and the developing Village municipal center Postl-Yore provided design and construction engineering services for a Quarter mile extension of a two-lane collector street, which included a bike patch which connected to the existing Will County Forest Preserve Districts bike path network, sidewalk, storm sewer, sanitary sewer, and water main extensions. Engineering services included field data acquisition, storm sewer modeling, engineering design of utility plan and profile, roadway design, preparation of contract plans, IDOT approval, handling and review of public bids, recommendation, construction inspection and contract administration.
